

BUILDING BETTER SCIENCE

## REDUCE SERVICE COSTS WITH NEW, INNOVATIVE SELF-MAINTENANCE TOOLS

Keeping your Agilent LC and CE system in top condition!

Regular and professional preventive maintenance is essential for keeping instruments at peak performance. However, operating budget limitations are a challenge for academic institutions and teaching facilities.

Now you can perform regular diagnostics and preventive maintenance on your system for a minimal cost.

### Agilent Lab Advisor – the HPLC and CE operator's Swiss Army Knife

Agilent Lab Advisor is the chromatography data system (CDS)–independent diagnostic toolset for your lab. The basic version is free with each LC pump or CE system you purchase. It combines ready-to-run instrument tests, calibration procedures, and the most advanced firmware update tool for all Agilent 1100 Series, 1200 Series, 1200 Infinity LC, and 7100 CE instruments.

The advanced version offers additional features, such as access to more than ten instrument modules, signal monitoring, early maintenance feedback (EMF) setup, a powerful diagnostic data repository, and more.

### Maintenance Wizard – the innovative self-maintainer tool

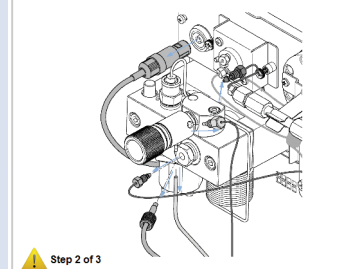

Maintenance Wizard is an add-on to Agilent Lab Advisor and provides multimedia-enhanced, easy, and intuitive step-by-step maintenance procedures for Agilent LC systems. It comes with a USB dongle pre-loaded with ten preventive maintenance executions.

**Please contact your local Agilent sales representative for further information.**

### Maintenance Wizard – a perfect self-maintenance solution

Remove pump heads.

Disconnect the capillaries at the back of the purge valve holder, the pump head adapter and the tube at the active inlet valve. Beware of leaking solvents.

Convenient upfront parts ordering at the Agilent Online Store or via fax/email and step-by-step instructions with animated video support make the Maintenance Wizard the perfect self-maintenance solution. Only in selected countries available.
