

Elevate your business with Cloud-Deployed Empower CDS

Cloud-deployed Empower™ Chromatography Data System (CDS) provides your organization the speed and agility to bring your laboratories online, allowing you to focus on science.

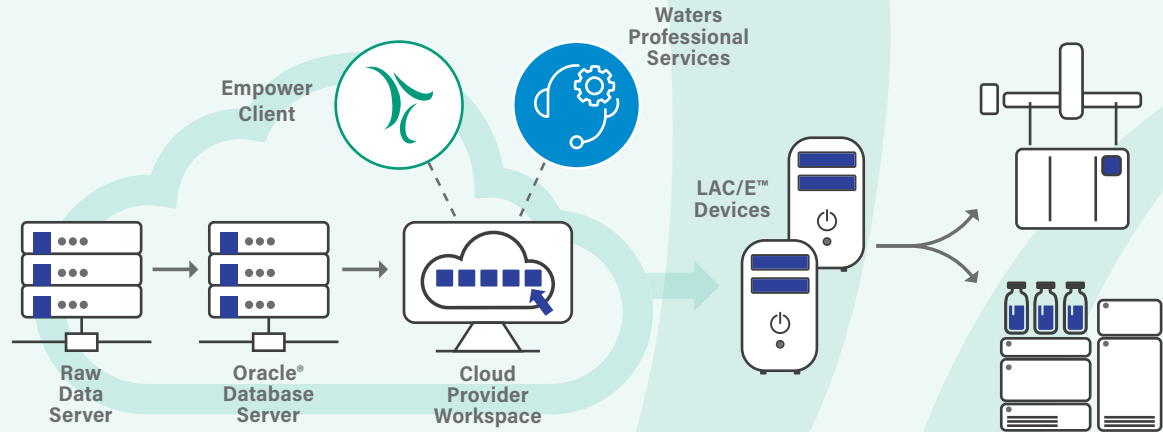

Leveraging cloud deployment for your network enables you to reduce the infrastructure barriers of networks and increase resources based on demand so you can drive operational efficiency and improve consistency, quality, and compliance, while optimizing your disaster recovery model.

THE FIRST CLOUD-DEPLOYABLE, COMPLIANCE-READY, CHROMATOGRAPHY DATA SYSTEM

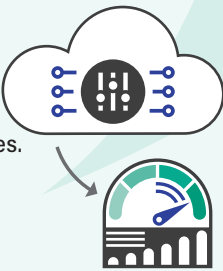

FLEXIBLE

Select your preferred cloud provider to leverage the IaaS (Infrastructure as a Service) capabilities essential for your organization. Start with the configuration required and add resources as needed.

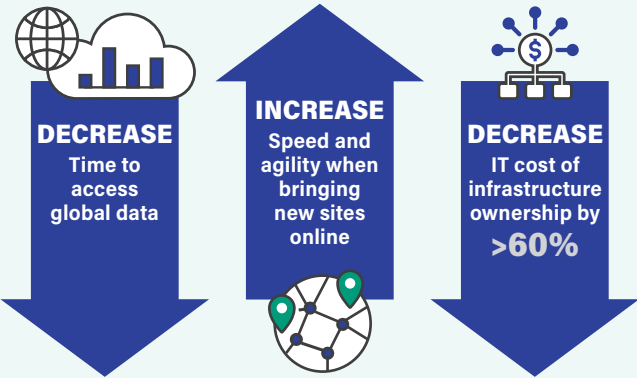

SIMPLIFY OPERATIONS AND MINIMIZE RISK

Centralize Empower CDS to the cloud across your organization to bring standardization to your global platform so you can speed up decision making and streamline deployments and upgrades. Increase and decrease resources to accommodate for growth without having to reinstall, requalify, and revalidate.

REDUCE COSTS

Remove dependencies on data centers that require large upfront capital costs and the associated ongoing personnel and maintenance expenses. Leverage only the infrastructure needed for your operations.

IMPLEMENTATION SERVICES AND SUPPORT

Expand your team by leveraging Waters experts. Let us design your system to meet your organization requirements and achieve your timelines, including Project Management and Validation Services.

REDUCE DATA SILOS AND MAXIMIZE THE VALUE OF YOUR DATA

Break the barriers across your high value data to enable technical information sharing across sites through centralized processes and platforms.

Secure, fast connections around the globe so you can focus on the science.
