

NEW PRODUCT

CHROMTECH ICE-STAR

MULTI COOLING DEVICE

The ICE-STAR is an easy, reliable and rugged unit for cooling CTC PAL trays down to 20°C below ambient temperature.

Besides offering fast cooling capability for CTC PAL trays, the ICE-STAR can also be used to cool other devices such as GC PTV inlets, cold traps etc.

Since there is no need for cryogenic coolants, e.g. LN₂ or LCO₂, the ICE-STAR represents a cost-effective and safe alternative.

FOR CTC PAL TRAY

- Peltier-Liquid cooling principle
- Maintenance-free design
- Cooling down to 20°C below ambient temperature
- Optional cooling device for PTV inlets and cold traps

ICE-STAR „PLAY IT COOL!“
